

It's not a TRASHCAN!

“Disposable” does not mean “Flushable”

Flushing paper towels, baby wipes and other garbage down the toilet can cause costly sewer back-ups and damage equipment during wastewater treatment. The related costs for correcting these problems can be passed on to consumers through increased sewer and water bills.

So treat your toilet with respect and only flush your “number ones and twos” .

Never flush any items like:

- Baby Wipes or Diapers
- Rags or Towels
- Cotton Swabs
- Syringes
- Candy or Food Wrappers
- Cleaning Sponges
- Any Plastic Item
- Kitty Litter
- Hair
- Underwear
- Latex Gloves
- Sanitary Napkins
- Disposable Brushes or Mops
- Pharmaceutical Products
